

Archibus[®] by eptura[™]

Streamline
workplace
navigation with
turn-by-turn
wayfinding

With Archibus's new integration with Mapsted, users can find their way around the office or corporate campus more easily than ever.

Wayfinding streamlines navigation and enhances the workplace experience for everyone. With turn-by-turn navigation, you can guide employees and visitors through your space effortlessly. Access directions between buildings, find booked spaces and meetings, and plan efficiently. Visitors can navigate unfamiliar buildings through lobby kiosks, while the Archibus mobile app supports QR code scanning.

Eptura's Q3 Workplace Index revealed that across 16,000 global customers, visitor attendance today is higher than it was even pre-2020.

Seamless navigation

Guide guests and employees through your space with turn-by-turn navigation, ensuring a smooth and welcoming experience.

Easy building-to-building directions

If you have a campus with multiple buildings, employees can access directions from one building to another, eliminating confusion and saving time.

Find booked spaces and meetings

Employees can easily locate their booked working spaces and meeting rooms, ensuring they arrive on time and maximizing productivity.

Efficient planning

Employees can view the fastest path to their booked working space or a meeting they must attend, enabling better time management and reducing unnecessary delays.

Enhanced visitor experience

When Workplace is deployed on a lobby kiosk, building visitors can access routes to locations within an unfamiliar building, making it effortless for them to navigate and find their destination.

Mobile app convenience

The Workplace mobile app supports navigation through QR code scanning, allowing users to easily access directions and find their desired location.

User-friendly integration

The Wayfinding button seamlessly integrates Mapsted's wayfinding technology into Workplace, providing a user-friendly interface for accessing directions.

Mapsted interface overlay

Once the Wayfinding button is selected, the Mapsted interface overlays Workplace, allowing users to enter their destination and navigate with ease.

Compatibility and flexibility

Wayfinding is compatible with both SaaS and non-SaaS instances, ensuring that it can be seamlessly integrated into your existing Archibus deployment.

Requirements and support

To enable the integration, the Archibus Wayfinding license must be enabled, and you must have a valid license for Mapsted services. Additionally, the necessary digital maps with room-level attributes must be created in Mapsted, and the application parameters must be properly set.

Frequently asked questions

1. What is wayfinding and how can it benefit my organization?

Wayfinding is a navigation system that guides people through your space with turn-by-turn directions. It helps welcome guests to your buildings and enables employees to find unfamiliar locations easily. By integrating wayfinding into your Archibus deployment, you can improve employee productivity, enhance visitor experience, and streamline navigation throughout your workplace.

2. How can wayfinding help employees in a campus with multiple buildings?

If you have a campus with multiple buildings, employees can access directions from one building to another. This eliminates confusion and saves time by providing clear and efficient routes between different points within your campus.

3. Can wayfinding help employees find their booked working spaces and meeting rooms?

Absolutely! Wayfinding provides employees with directions that guide them to their booked working spaces and meeting rooms. This ensures they can easily locate the room and arrive on time, maximizing productivity and reducing unnecessary stress.

4. Can employees see the fastest path to their working space or a meeting they must attend?

Yes, employees can view the fastest path to their booked working space or a meeting they must attend. This planning feature allows employees to optimize their time management and ensures they can reach their destination efficiently.

5. How does wayfinding benefit building visitors?

When Workplace is deployed on a lobby kiosk, building visitors can access routes to locations within an unfamiliar building. This feature makes it effortless for visitors to navigate and find their desired location, enhancing their overall experience.

6. Can I use wayfinding through the Workplace mobile app?

Yes, navigation through the Workplace mobile app is supported through QR code scanning. Simply scan the code, and the app will guide you to your desired location, making it convenient and easy to navigate through the workplace.

7. How does the Wayfinding button work in Workplace?

To support various scenarios, Workplace integrates Mapsted's wayfinding technology by providing a Wayfinding button on key Workplace pages, including Find People and Places, Meeting Space Booking Detail, and Workspace Booking Details. By clicking on the Wayfinding button, users can access the Mapsted interface and enter their destination to receive turn-by-turn directions.

8. What are the requirements for integrating wayfinding features?

To integrate wayfinding features, you need to have an enabled Archibus Wayfinding license. Additionally, you must have a valid license for Mapsted services and have created digital maps stored in Mapsted with room-level attributes. The buildings within a single Archibus site should be configured in a single property in Mapsted. Properly setting the application parameters is also necessary for seamless integration.

9. How does the Mapsted interface work with Workplace?

Once you select the Wayfinding button in Workplace, the Mapsted interface overlays Workplace. You can then enter your start and destination locations within the same floor. Mapsted will outline the route in blue on the floor plan and provide turn-by-turn written instructions. After reaching your destination, you can select the Return to Workplace button in the Workplace interface to seamlessly transition back to your regular workflow.

10. Is wayfinding compatible with both SaaS and non-SaaS instances?

Yes, wayfinding is compatible with both SaaS and non-SaaS instances. However, for non-SaaS instances, your company's IT policy must allow the Workplace application to connect to the external APIs.
