

Archibus Workplace

Connect and automate the workplace to enable more efficient, collaborative, and productive spaces.

Archibus Workplace is designed to revolutionize how you manage your spaces and interact with all your facility data. By integrating cutting-edge technology and comprehensive data analytics, this self-service application ensures facility information is visible, space planning and moves are seamless, and your teams are empowered to make facility requests seamlessly.

Archibus Workplace seamlessly integrates into your existing systems, centralizing data to provide a single source of truth. This integration enables better decision-making, reduces operational costs, and enhances the overall efficiency of workplace management for organizations aiming to meet modern operational standards.

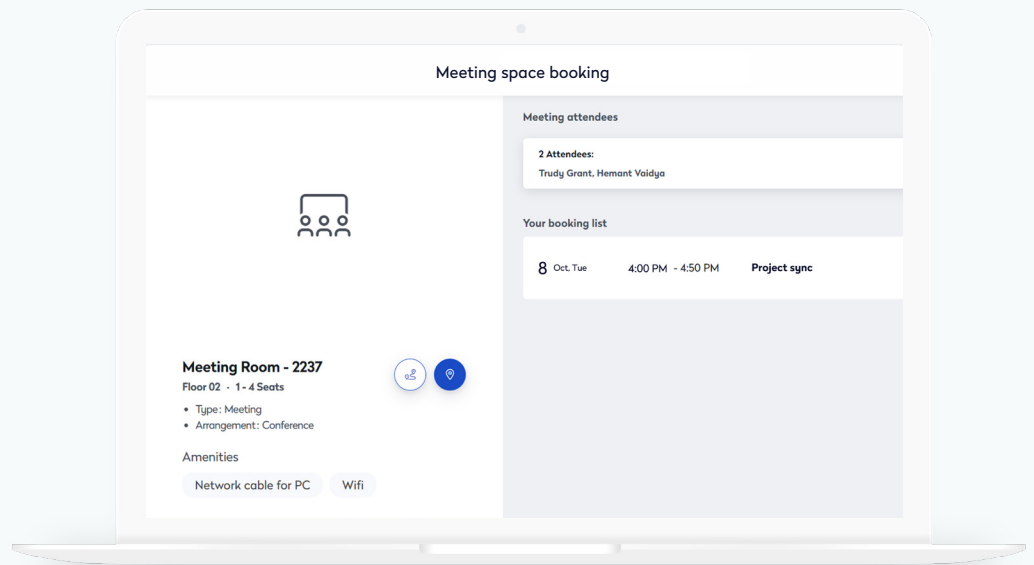

When somebody asks for a **certain** room type or category type, I can pull up that information, run a report, and have everything **formatted** in five or 10 minutes.

Michael DuLaney – UC Health

Meet modern **operational** standards and **enhance** workplace efficiency

Building operations

- Centralize and prioritize all work requests generated in the workplace.
- Plan preventive maintenance schedules to reduce costly breakdowns.
- Automate work requests using a mobile app for technicians and vendors.
- Evaluate request metrics by costs, team, type, and location.

Space planning

- Coordinate individual and group moves to optimize space.
- Plan, allocate, and move occupants efficiently across multiple sites.
- Increase real estate capacity with innovative team space solutions.

Asset management

- Centralize workplace assets in a comprehensive lifecycle management system.
- Track all equipment, parts, furniture, and systems effectively.
- Integrate asset management with 2D and 3D building information modeling.
- Extend asset lifecycles with comprehensive data and management consoles.
